

# Playground & Landscape Border Edging

Our 9" tall playground & landscape borders are made with recycled plastic and Manufactured in the USA.

These maintenance free borders will not rot, splinter, crack or decay like wooden borders will over time.

They are environmentally friendly to the soil unlike treated borders or railroad ties and are insect resistant.

There are no sharp corners or edges which offer greater protection to children hurting themselves.

Each border requires 1 border stake to secure the border to the ground.

Size: 48" Long X 9" High X 3.5" wide.  
Overall length is 54"

Rotational Molded of Recycled Plastic these borders come in the stock color of black but can be manufactured to compliment your projects color scheme. \*

Border Calculations: To calculate how much border you need for your project measure each side of the project area in feet and divide by 4 to give you the number of sections needed for each side. Total the number of section to calculate your projects requirements.
